

Relax.

(Hydrotherapy Pools
don't have to be hard work).

/ Hydrotherapy.

The benefits of hydrotherapy are well established. Hydrotherapy detoxifies, loosens tight muscles, encourages relaxation, increases the metabolic rate and digestion activity, hydrates the cells, improves skin and muscle tone, boosts the immune system, and improves the function of the internal organs by stimulating the blood supply.

/ A New Chapter.

At Innova® Care Concepts, we're pleased to announce a new chapter for hydrotherapy pools in the UK. Gone are the days of high-cost, high-maintenance, high-infection risk therapy pools. Our new stainless steel hydrotherapy pools have lower manufacturing and installation costs, require less maintenance, last longer, are better for infection control, and are bespoke designed for each situation. What's more, we'll be with you every step of the way, right from the consultation stage through to installation and maintenance.

/ Why Stainless Steel?

Stainless steel pools have considerable advantages over the traditional construction of pools, including:

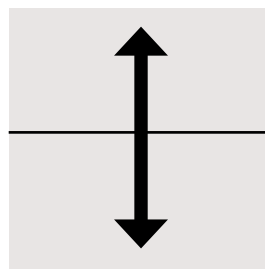

- Lower manufacturing costs
- Lower installation costs
- Lower maintenance costs
- Quicker and easier installation
- Better durability and longer lifespan
- Better for infection control
- Every pool is bespoke designed to suit the use and environment
- The original finishes remain perfect, meaning that no polishing is required
- Stainless steel looks high-quality and elegant

/ Features & Options

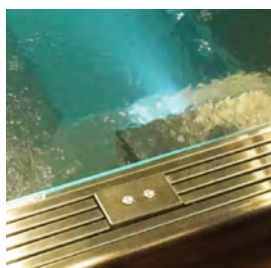

Numerous options are available for our hydrotherapy pools. Remember, each pool is bespoke designed by our CAD teams, and is manufactured to your specifications, so you can include whichever options are most appropriate for the situation. Our hydrotherapy pool specialists are able to help you specify the pool in the initial consultation meeting.
