

# TR 1700

## Height adjustable bathtub

Hygiene Equipment  
Designed for People

### TR 1700 Space saving bathtub

TR 1700 was specifically designed to optimise smaller spaces without sacrificing function and efficiency. Ideal for hospitals, nursing homes and private homes who have limited space and require a fully functioning bathtub. The bath raises and lowers to find an ideal height for the caregiver, reducing heavy lifting and static load. Clearance below the tub allows the use of many different types of hoists and easy floor cleaning.

Registered at Medical Products Agency, Sweden as a MDR Class 1 product according to MDR 2017/745.

TR reserves the right to make design changes and/or improvements without notice.

# TR 1700

## Height adjustable bathtub

Hygiene Equipment  
Designed for People

- The TR 1700 raises quietly and quickly. The hand control for raising and lowering can be operated from either side of the bathtub.
- Pop-up drainage closes and opens by turning the overflow valve. No hands needed to be in the water.
- The factory mounted thermostat mixer regulates both the filling and shower water temperate.
- The shower handle has a soft rubber outlet nozzle which is easy to clean and gives a comfortable and soft water dispersion.
- The bathtub is made of glassfibre gelcoat and the frame and skirts are made of powder coated steel.
- The drainage can be attached to the floor or wall.
- Adjustable feet increase the safety and comfort when there are uneven floor surfaces.
